

FAST. PERMANENT.

Easily connect post-frame structures to concrete

STURDI-WALL
ANCHOR BRACKETS

◀ Sturdi-Wall® brackets make permanent foundations fast, easy, and professional

The industry's only ICC-ES-certified brackets are engineered to streamline and accelerate your post-frame construction on traditional concrete foundations. Sturdi-Wall® and Sturdi-Wall® Plus heavy-duty anchor brackets are the fastest and most durable way to connect post-frame structures to monolithic slabs, formed walls, and existing concrete pads. These one-of-kind solutions are ideal for new construction, post repair, renovations, and more. They are compatible with concrete already poured and cured as well as concrete being poured on site.

- ICC-ES-certified products
- 100 percent American-made steel
- Durable coating resists corrosion

STURDI-WALL® DRILL-SET MODEL

For applications in which the concrete foundation has already been poured and cured, use the Sturdi-Wall® drill-set model. It reduces costly placement errors when a concrete subcontractor is used. Installation is quick and easy, requiring only a hammer drill with masonry bit and concrete fasteners.

STURDI-WALL® PLUS WET-SET MODEL

Achieve the highest ultimate-strength connection to your foundation with Sturdi-Wall® Plus. These anchors install while concrete is still wet, eliminating time-consuming drilling and the expense of concrete anchors. They feature special-grade ½-inch or ⅝-inch rebar that is seismic-rated.

- **Compliant with International and Residential Building Codes**
- **American-made, ¼-inch, robotically welded steel**
- **Powder coating prevents corrosion, exceeds 2,500 salt spray hours**
- **Models sized to fit solid wood posts, nail-lam columns, and glu-lam columns**

All the hardware and accessories needed to install both Sturdi-Wall® and Sturdi-Wall® Plus anchor brackets can be found on the Perma-Column website. Hardware can be purchased individually or in kits to match your need.

A COMPLETE LINE OF PERMANENT FOUNDATION SOLUTIONS

Precast concrete post-frame columns

Installed using builders' existing post-frame construction methods, Perma-Column® precast concrete columns elevate wood out of the ground, preventing costly rot and decay.

Precast deck posts

Perma-Column® precast concrete deck posts install quickly and easily, eliminating the hassles and delays of mixing and pouring concrete on site.
